CONTENTS OF VOLUME XXVIII.

OSBORNE, THOMAS B., and WAKEMAN, ALFRED J. Some new constituents of milk. Second paper. The distribution of phosphatides in milk 1

WELLS, H. GIDEON. The antigenic properties of β-nucleoproteins.... 11

LEWIS, HOWARD B., and KARR, WALTER G. Changes in the urea content of blood and tissues of guinea pigs maintained on an exclusive oat diet 17

SALANT, WILLIAM, and WISE, LOUIS E. The action of sodium citrate and its decomposition in the body 27

JOHNS, CARL O., and BREWSTER, J. F. Kafirin, an alcohol-soluble protein from kafir, *Andropogon sorghum* 59

JONES, D. BREESE, and JOHNS, CARL O. Some proteins from the jack bean, *Canavalia ensiformis* 67

JOHNS, CARL O., and JONES, D. BREESE. The proteins of the peanut, *Arachis hypogæa*. I. The globulins arachin and conarachin.. 77

CURTMAN, L. J., and FREED, M. A modified Benedict and Hitchcock uric acid standard solution 89

SHIBATA, K., NAGAI, I., and KISHIDA, M. The occurrence and physiological significance of flavone derivatives in plants. Plate 1 93

OSBORNE, THOMAS B., and LEAVENWORTH, CHARLES S. Protein copper compounds 109

BLUNT, KATHARINE, and WANG, CHI CHE. Chinese preserved eggs—pidan 125

MCCLENDON, J. F. The composition, especially the hydrogen ion concentration, of sea water in relation to marine organisms 135

MCCOLLUM, E. V., SIMMONDS, N., and PITZ, W. Dietary deficiencies of the maize kernel 153

KINGSBURY, F. B. A perfusion pump. Plates 2 and 3 167

LOEB, JACQUES. The mechanism of the diffusion of electrolytes through the membranes of living cells. IV. The ratio of the concentration required for the accelerating and antagonistic action upon the diffusion of potassium salts 175

WISE, LOUIS ELSBERG. Elimination of malates after subcutaneous injection of sodium malate 185

HILLER, ALMA, and MOSENTHAL, HERMAN O. The relation between the water and glucose concentration of the blood 197

KAHN, R. L. The Folin and Denis method of nitrogen determinations by direct Nesslerization, and its application to spinal fluids 203

309373

McCollum, E. V., Simmonds, N., and Pitz, W. The effects of feeding the proteins of the wheat kernel at different planes of intake.... 211
Nelson, C. Ferdinand, and Williams, J. L. The urinary and fecal output of calcium in normal men, together with observations on the hydrogen ion concentration of urine and feces..... 231
Nelson, C. Ferdinand, and Burns, W. E. The calcium and magnesium content of normal urine..... 237
Hart, E. B., and Sure, Barnett. The influence of carbohydrates on the accuracy of the Van Slyke method in the hydrolysis of casein..... 241
Addis, T., and Watanabe, C. K. A method for the measurement of the urea-excreting function of the kidneys..... 251
Murlin, J. R., and Sweet, J. E. Pancreatic diabetes in the dog. IV. The influence of pylorus exclusion and of gastrectomy upon the effects of pancreatectomy..... 261
Murlin, J. R., and Craver, L. F. Preliminary observations on the influence of sodium carbonate, administered by duodenal tube, upon human diabetes..... 289
Bunzell, Herbert H. The relationship existing between the oxidase activity of plant juices and their hydrogen ion concentrations, with a note on the cause of oxidase activity in plant tissues.... 315
Hunter, Andrew, and Campbell, W. R. A hitherto neglected factor affecting the determination of minute quantities of creatinine... 335
Folin, Otto, and Doisy, E. A. Impure picric acid as a source of error in creatine and creatinine determinations..... 349
Bock, Joseph C. The estimation of amino-acid nitrogen in blood.... 357
Hunter, Andrew. Studies in the comparative biochemistry of purine metabolism. III. The presence of allantoin in mammalian blood..... 369
Bohn, Ralph M. The iodine content of food materials..... 375
Weston, Paul G. Colorimetric methods for determining serum cholesterol..... 383
Falk, K. George. The mode of action of urease and of enzymes in general..... 389
Van Slyke, Donald D., and Cullen, Glenn E. The mode of action of urease and of enzymes in general..... 391
Leary, J. T., and Sheib, S. H. The influence of the coagulation by rennin upon the gastric digestion of milk proteins..... 393
Sharpe, J. Smith. The preparation of guanidine..... 399
McGregor, H. H. Proteins of the central nervous system..... 403
Dubin, Harry. A note on the influence of inosite upon the excretion of phenol in the dog..... 429
Bosworth, A. W., and Bowditch, H. I. Studies of infant feeding. The chemical changes produced by the addition of lime water to milk..... 431
Chernoff, L. H., Viehoever, Arno, and Johns, Carl O. A saponin from *Yucca filamentosa*..... 437

DYER, D. C. A new method of steam distillation for the determination of the volatile fatty acids, including a series of colorimetric qualitative reactions for their identification 445
MOORE, A. R. The mechanism of cytolysis in sea urchin eggs 475
MCCOLLUM, E. V., SIMMONDS, N., and PITZ, W. Is lysine the limiting amino-acid in the proteins of wheat, maize, or oats? Plate 4 .. 483
CARR, R. H., SPITZER, GEORGE, CALDWELL, R. E., and ANDERSON, O. H. The efficiency of certain milk substitutes in calf feeding .. 501
LA FORGE, F. B. *d*-Mannoketoheptose, a new sugar from the avocado. 511
WRIGHT, F. E. Crystallographic and optic properties of mannoketoheptose and of the osazones of mannoketoheptose and mannoaldoheptose 523
Index to Vol. XXVIII 527
